5× revenue	400%+ ROI	New revenue stream	20 products	9 books, 62 tracks
₹15L → ₹80L/mo in 4 months	ET Prime, in 6 months	Half Marathon, 18K+ runners	built in 5-6 months	7.7K+ YouTube views

PROFILE

Engineer turned product leader across consumer platforms, subscriptions, sales operations and international ecommerce. I connect problem definition, customer journeys, AI-assisted development and experimentation to ship products that lift conversion, retention and operational efficiency. Currently building **Parwah**, a family-care app for Indian families looking after ageing parents, and available for freelance builds and fractional product and growth engagements.

SKILLS

Product: Discovery and prioritisation · Roadmaps · Experimentation · Subscription monetisation · Conversion funnels

Growth: Lifecycle and retention · CRM (Klaviyo, WebEngage) · D2C growth · Analytics

AI and build: AI agents and workflows · Next.js · Supabase · Vercel · Android and iPhone apps · Cross-functional delivery

PROFESSIONAL EXPERIENCE

Parwah, family-care app for India

Sep 2026 to Present

- Building a family-care app for Indian families looking after ageing parents, so siblings in different cities can share their parents' care without anything slipping.
- Treated care as **a task problem, not a chat problem**: every need moves from open to assigned, claimed and done, with one tap to say "I'm on it", ending the family WhatsApp group's "I thought you did".
- Made handing a task back normal, with full history kept, and every action checks that the right family member is making the change. **Live at parwah-hq.anchit-tandon.com.**

Vahdam India

Apr 2026 to Sep 2026

AGM, Product Management and D2C Growth

- Led D2C product and growth across **US, UK and global markets**, covering customer experience, product performance and revenue optimisation.
- Ran product and CRM experiments, including lifecycle campaigns on **Klaviyo and WebEngage** and customer-rating improvement initiatives.
- Helped build a **customer lifecycle and retention OS** that links analytics, planning, segmentation and mailer generation in one loop, and helped **lift UK marketing revenue within the first two months**.

Times Internet

Jun 2022 to Apr 2026

Senior Product Manager — Apr 2025 to Apr 2026

Product Manager — Oct 2023 to Mar 2025

Associate Product Manager — Jun 2022 to Oct 2023

Assisted conversion and subscriptions

- Scaled Economic Times assisted-sales monthly revenue **5× within 4 months, from ₹15L to ₹80L**, through funnel redesign and continuous experimentation; delivered **400%+ ROI within six months** on ET Prime's structured assisted-conversion funnel.
- Built **AI TeleSuite** for call transcription, quality scoring and pitch assistance, standardising conversion execution across high-intent traffic.
- Launched Assisted Buying, growing qualified leads from **about 30 to 150+ a day**; lifted subscriber retention by **10%** through onboarding and engagement experiments.

Consumer platforms and new product launches

- Led the ET Markets web and mobile-web revamp, lifting engagement by **27%** and unlocking **₹3Cr+** in incremental annual revenue.
- Revamped the ET Markets Android and iOS apps, growing daily active users by **25%** and average session duration by **15%**.

- Launched paid wellness subscriptions for **Times Health+**, and led discovery, registration and acquisition journeys for the inaugural **Times Internet Delhi Half Marathon (18K+ runners)**, setting up a **new revenue stream**.

EARLIER EXPERIENCE

Citymall, Software Engineer Mar 2022 to Jun 2022

- Supported data pipelines and backend systems for consumer commerce platforms.

Tuple Technologies, Software Engineer Apr 2020 to Mar 2022

- Built backend services for consumer apps and owned an early **live sports commentary product**.

EDUCATION

B.Tech, Computer Science and Engineering, Vellore Institute of Technology 2016 to 2020

SELECTED INDEPENDENT PRODUCT BUILDS

LifeCycle-OS, lifecycle marketing platform lifecycle-os.anchit-tandon.com

For D2C growth teams shipping emails, ads and landing pages for every cohort, every week: any brand in, a full lifecycle plan and on-brand content out in seconds, with missing facts marked **"data required", never invented**.

The Third Eye, personal AI operating system the-third-eye.anchit-tandon.com

For people whose tasks, notes and goals live in separate apps: one assistant, by voice and camera, that plans, remembers and acts across their email, calendar and **76 linked apps**.

Predict Natural Disasters, live global hazard map predict-natural-disasters.anchit-tandon.com

For newsrooms, NGOs and operations teams who need one trustworthy view in a disaster: one map across **8 official sources**, where every forecast shows its evidence and is **graded afterwards**.

LoosenUp, stress relief for your worst 2 minutes loosenup.anchit-tandon.com

For the tense moment, not a 20-minute programme: a **2-minute** guided break with a before-and-after Calm gain, no account, works offline, and an SOS on every screen.

ENGAGEMENT FOCUS

- AI workflows and internal tools: call review, knowledge assistants, reporting dashboards and scoped integrations with human review. **Proof:** AI TeleSuite helped scale assisted-sales revenue from **₹15L to ₹80L a month**.
- Conversion-focused websites: clear offer positioning, enquiry or purchase journeys, CRM integrations and full-funnel measurement. **Proof:** The ET Markets web revamp lifted engagement **27%** and unlocked **₹3Cr+** in incremental annual revenue.
- Fractional product and growth: roadmap prioritisation, zero-to-one launches, conversion experiments and subscription or ecommerce retention. **Proof:** **400%+ ROI** within six months on an assisted-conversion funnel; subscriber retention up **10%**.
- Focused web MVPs and journeys: one core customer journey shipped end to end, with agreed acceptance criteria and a clean handover. **Proof:** Assisted Buying took qualified leads from **about 30 to 150+ a day**; the app revamp grew daily active users **25%**.
