PROFILE

An engineer who learned to love the funnel. I'm a product manager who builds to solve a problem: most PMs write the specs, I build them myself. I began in backend engineering and moved into product at Times Internet, working on assisted sales, subscriptions and consumer experiences, before taking on international D2C product and growth at VAHDAM. I helped grow assisted-sales revenue from ₹15L to ₹80L a month and ET Markets revenue by ₹3Cr+ annually. These days I build and test AI agents and products myself, from understanding the problem to getting a working solution into people's hands.

CORE SKILLS

Product: Customer discovery · Product strategy & roadmaps · PRDs and prioritisation · 0→1 launches · Experimentation · Monetisation

AI & engineering: LLMs & AI agents · RAG/pgvector · Tool calling · Model routing & fallbacks · Human approval gates · Python · TypeScript · Next.js · Supabase

Growth & analytics: Conversion funnels · Subscription retention · D2C · Lifecycle CRM · SQL · Analytics · Klaviyo · WebEngage · Mixpanel

PROFESSIONAL EXPERIENCE

Parwah | Independent Product Builder
Sep 2026 – Present

Family care for India · Product, design and engineering

- Building a family-care app for relatives coordinating support for ageing parents across cities. **Own the product, UX and implementation** from early decisions to the working website.
- Designed around a trust problem rather than a tracking feature: parents decide what to share, see who has access and can revoke it in one tap. Kept the experience senior-first with large text and simple navigation.

VAHDAM India | AGM, Product Management & D2C Growth
Apr 2026 – Sep 2026

US, UK and global D2C markets

- Worked across international customer journeys and conversion funnels, identifying friction and testing ways to improve product and CRM performance.
- Helped bring analytics, customer segmentation, campaign planning and mailer creation into one **lifecycle and retention workflow** instead of separate processes.
- Ran experiments using Klaviyo and WebEngage, contributing to an increase in UK marketing revenue within the first two months.

Times Internet | APM → Product Manager → Senior Product Manager
Jun 2022 – Apr 2026

ET Prime · ET Markets · Times Health+ · Delhi Half Marathon

- Took ET Prime assisted-sales revenue from **₹15L to ₹80L/month in four months** by improving lead journeys, call flows and ongoing A/B tests.
- Built a structured assisted-conversion programme that delivered **400%+ ROI in six months**; received the 2025 ET Prime Team Award as part of the team.
- Built AI TeleSuite to transcribe sales calls, score conversations and provide pitch guidance so teams could review and improve their calls more consistently.
- Led the ET Markets web and mobile-web redesign: **+27% engagement and ₹3Cr+ incremental annual revenue.**
- Improved the Android and iOS experience, contributing to **+25% DAU, +15% session duration and +19% screen views.**
- Created assisted-buying journeys that raised qualified leads from ~30 to **150+ per day**; onboarding and engagement experiments improved subscriber retention by **10%.**
- Launched Times Health+ paid subscription journeys and helped take the first Times Internet Delhi Half Marathon from concept to registration and acquisition for **15,000+ participants.**

EARLIER TECHNICAL EXPERIENCE

Citymall | Software Engineer Mar 2022 – Jun 2022

- Worked on backend services and data pipelines for consumer-commerce applications.

Tuple Technologies | Software Engineer & Product Owner Apr 2020 – Mar 2022

- Built backend services for consumer apps and took product ownership of an early live-sports-commentary product.

AI AND PRODUCT PORTFOLIO | 23 PROJECTS AND PROTOTYPES

• **LifeCycle-OS** — Lifecycle marketing platform for campaign planning, emails, ads and landing pages.

• **The Third Eye** — Personal AI operating system combining memory, tool use, voice and task workflows.

• **AI TeleSuite** — Transcription, call scoring and pitch coaching for high-intent sales teams.

• **Mailer Architect** — Multi-model workflow generating brand-aligned email campaigns and HTML mailers.

• **The How-To Engine** — AI-guided step-by-step learning with answer comparison and quality checks.

• **JobHunt** — AI-assisted job search, application tracking and tailored resume workflows.

• **Anchit LLM** — Interactive portfolio assistant that answers questions about my products and work.

• **Predict Natural Disasters** — Global hazard map using official feeds, forecasts and evidence checks.

• **Markets Pro** — Multi-market strategy research and paper trading; being refined.

• **Kolab** — Creator–brand collaboration product with analytics and account integrations.

• **Shoutout** — Platform for musicians to find gigs, collaborators and auditions.

• **Book Publishing Engine** — Quality-gated workflows behind nine independently published books.

• **Parwah** — Family care app for coordinating responsibilities, documents and consent.

• **Find-a-Flatmate** — In development: flatmate discovery centred on compatibility, budget and trust.

• **Edu AI** — AI-based personalised learning plan covering school years and exam pathways.

• **LoosenUp** — Two-minute stress-relief flow with progress feedback and quick help.

• **TH+ LifeEngine** — Personalised wellness plans for yoga, food and habit tracking.

• **Hey Yaara** — Hinglish conversational AI voice companion.

• **Animind** — Explores animal behaviour from brief audio and video clips.

• **Airpane** — AR-style web browsing with phone, webcam and screen interactions.

• **ANCHOR** — AI-led original techno music creation and publishing workflow.

• **MuseVibe Studio** — Music generation from mood and creative direction; being refined.

• **The Passion Table** — Home-style dining, delivery and tiffin service concept; being refined.
